## DV-10 Connections Illustration

DV-10 is one single portable scope which uses to inspect the environment behind the door.

Simply press the flat lens side against the pupil illustrated above and interior environment can be inspected through scope:

For example, if text 123 represents interior environment, inspector will obtain following views through scope.

Without DV-10,  
inspector cannot see clear  
through scope.

With DV-10,  
inspector can see clear  
through scope.
